

CECS 323: LAB COLLABORATION FILE

Introduction: The trade-off between having each student work individually versus using teams is that teams give you the chance to practice working together, but that also means that friction can arise between team members, particularly if the work does not get divided evenly. This quick survey must be turned in for each lab regardless of whether the team demos to me. I hope that this survey will help me identify teams in trouble early.

Assignment: RELATIONAL ALGEBRA 3

Partner #1: Matthew Zaldana

Partner #2: Brayan Fuentes Lopez

Partner #3: Hunter Lewis

Partner #4: Prince Angulo
